

Manage Instances

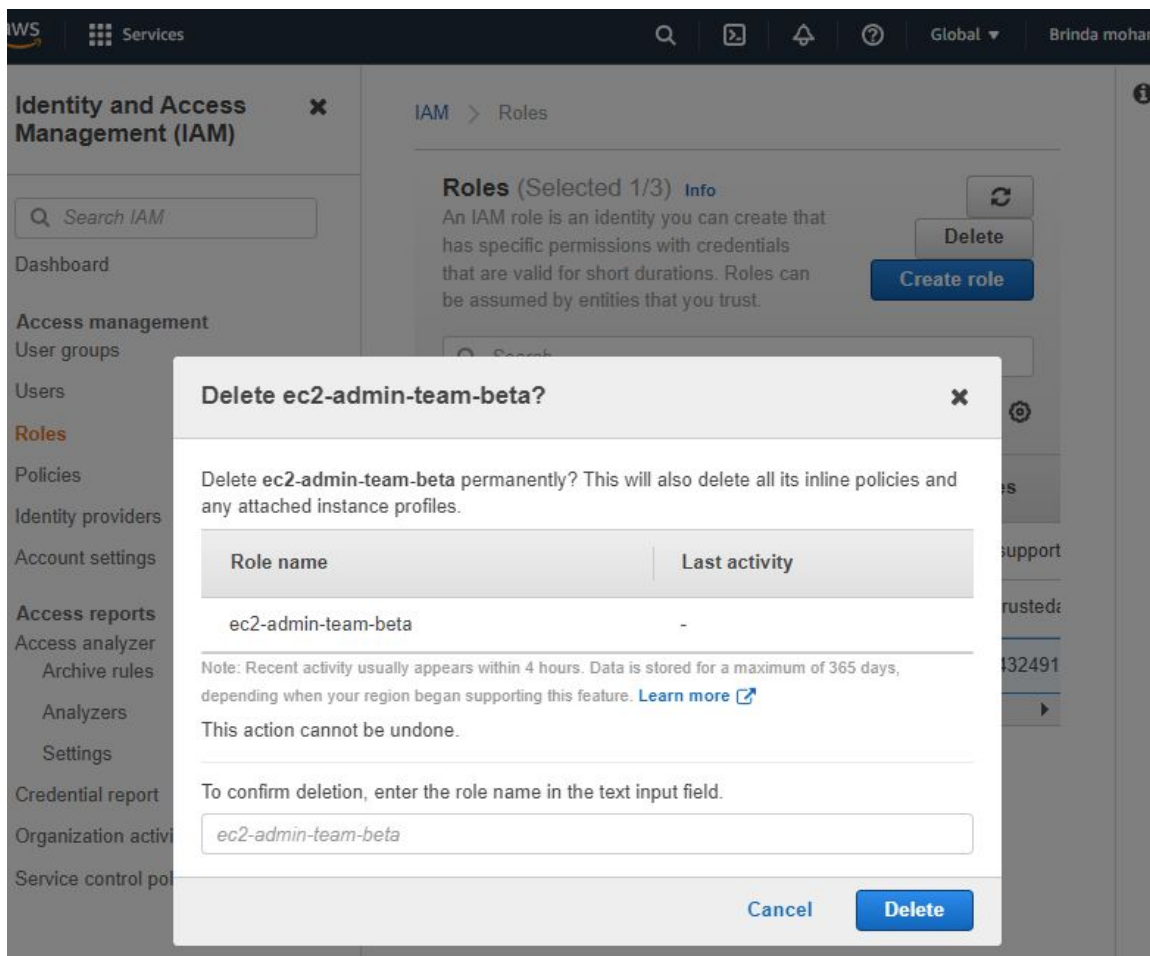

Continuing from 3.3 in the EC2 Management Console instances view, click the check box next to the instance named Test. Click Actions button then expand out Instance State then Terminate. Check the instance is the one you wish to terminate by it's name and click Yes, Terminate. The instance should now terminate.

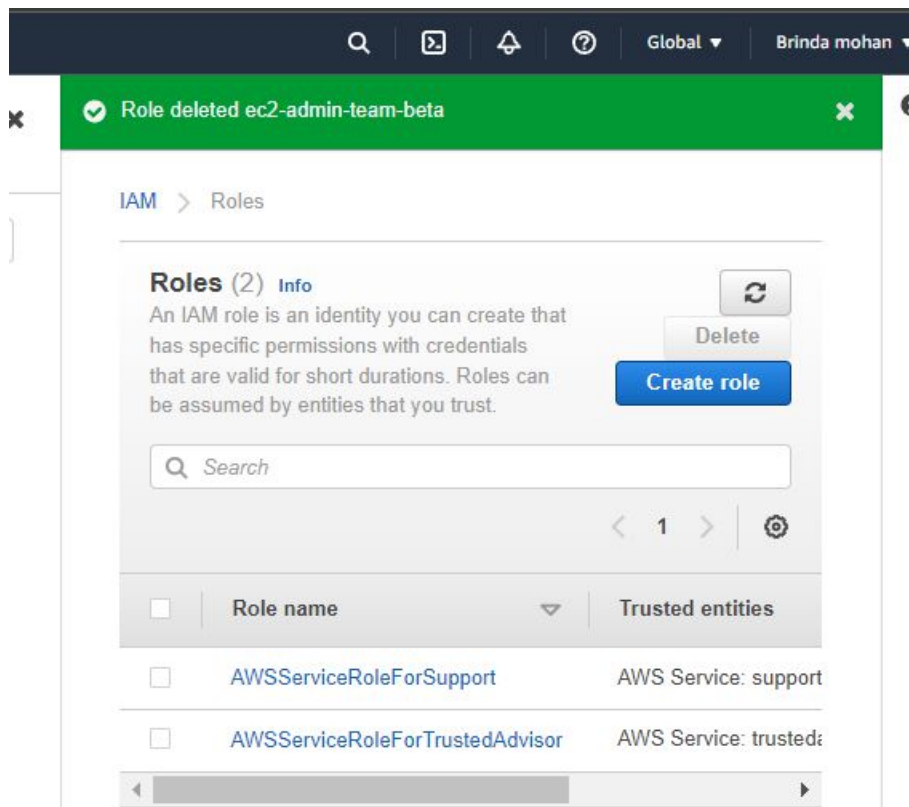

Delete Tags and Roles

Using the original IAM user, select the ec2-admin-team-beta role in the IAM console at <https://console.aws.amazon.com/iam/> and click Delete role.

For each of the policies created, one at a time select the radio button then Policy actions drop down menu then Delete.
